Program Information

This ophthalmic medical personnel continuing education is held in conjunction with the GEM Eye Meeting, which includes an educational program for ophthalmic medical personnel. The GEM Eye Meeting began in 2009 as a way to bring eye care professionals and specialists from around the state and region together to learn, collaborate and develop professionally. It is hosted by the Georgia Society of Ophthalmology (GSO), Emory Eye Center & Emory University School of Medicine and the Department of Ophthalmology, Medical College of Georgia (MCG), Augusta University.

Target Audience

The target audience for this educational activity are Certified Ophthalmic Assistants, Certified Ophthalmic Technicians and Certified Ophthalmic Medical Technologists.

Program Information

Educational Objectives

After attending this meeting, participants should be able to

- Increase knowledge of recent medical advances in the diagnosis, management and treatment of diseases of the eye
- Learn and improve techniques that will allow the ophthalmic technician to offer the best treatment options and care to patients
- Improve standards of practice

Program Information

Continuing Education Credits

This course has been awarded 6 JCAHPO credits. At the end of the course, please complete the online Course Evaluation Form that will be emailed to you to receive your CE Certificate. JCAHPO does not retain records of CE credits earned. For more information about JCAHPO credits, contact Carolyn Jones, GSO Director of Meetings & Events, at carolyn@ga-eyemds.org or 404-299-6588.

• • • • • • • • • •

The mission of the Georgia Society of Ophthalmology is to serve the visual health care needs of the people through public & professional education, membership services, & legislative advocacy. The Georgia Society of Ophthalmology is dedicated to the public's direct access to an ophthalmologist's care.

Executive Office

The GSO Executive Office is your professional resource and direct connection to GSO and all it has to offer including professional development, leadership involvement, continuing medical education events, publications, and other information of interest to ophthalmologists in Georgia. The Executive Office encourages and appreciates your comments and feedback. We are here to answer your questions and help address your concerns about the practice of ophthalmology in Georgia.

GA Medical Eye PAC

The Georgia Medical Eye Political Action Committee (PAC), on behalf of the Georgia Society of Ophthalmology, represents the political interests of Georgia ophthalmologists and their patients. Contributed funds are used to show bipartisan support of our friends in the Georgia legislature who champion the causes and concerns important to ophthalmology and medicine in our state.

SOS LEGAL & ADVOCACY

FUND

GSO Foundation

The Georgia Society of Ophthalmology Foundation is a 501(c)(3) charitable organization whose mission is to support, promote, and develop projects and programs that raise awareness of and offer assistance to Georgians with ocular disease and conditions of the eye. Through the generous support of members, individuals, and commercial entities, the GSO Foundation funds projects that support underserved populations and address unmet needs related to eye health and access to care in Georgia.

SOS Legal & Advocacy Fund

The SOS Legal & Advocacy Fund is an expansion of the Legal Defense Fund (LDF), which was created as a rainy-day fund to pay for legal representation if legal issues over the practice of ophthalmology arise. After the events of the 2017 legislative session, the Council realized there are broader and immediate concerns requiring financial attention—and therefore decided to expand and re-brand the LDF to also include advocacy funding, hence the new name. For GSO, SOS stands for Safe Ophthalmic Surgery.

The Georgia Society of Ophthalmology must ensure balance, independence, objectivity, and scientific rigor in all our sponsored educational activities. In accordance with the Essential Areas and Standards for Commercial Support of the Accreditation Council for Continuing Medical Education (ACCME), faculty members must disclose relationships with a commercial interest if: (a) the relationship is of a financial nature and occurred within the past twelve (12) months AND (b) the individual has the opportunity to affect the content of CME with regard to the products or services of that commercial interest.

ACCME has not set a minimum dollar amount defining relationships considered to be significant. Inherent in any amount is the incentive to maintain or increase the value of the relationship. ACCME considers relevant financial relationships of a spouse or partner to be significant and requires them to be disclosed.

The intent of this disclosure is not to prevent a presenter with a significant financial or other relationship from participating as a faculty member, but rather to provide learners with information on which they can make their own judgments. It remains for the audience to determine whether the speaker's interests or relationships have influenced or created bias within the presentation. If an individual is uncertain about what might constitute a potential financial conflict of interest, they should err on the side of full disclosure.

In addition to disclosure of financial relationships, presenters must make a meaningful disclosure to the audience of their discussions of unlabeled or unapproved drugs or devices. All disclosures must be indicated on the first slide of each presentation, per the ACCME "first slide policy."

Financial Disclosure

The following speakers and/or program committee members have no relevant financial relationships to disclose:

Brent Hayek, MD, FACS

Oculoplastic & Reconstructive Surgeon, Ophthalmologist

North Georgia Eye

Biography

Brent Hayek, MD, is an oculoplastic and reconstructive surgeon and delighted to join North Georgia Eye. Prior to joining, Dr. Hayek was Associate Professor in Oculoplastic and Reconstructive Surgery, Department of Ophthalmology at the Emory University School of Medicine. He brings a decade of expertise in the care of adults and children including reconstructive and cosmetic procedures of the eyelids, face, orbit, and tear drainage system.

He graduated summa cum laude from Oral Roberts University and worked for 5 years as an analytical chemist. He graduated the University of Iowa School of Medicine AOA and then completed his internship in General Surgery, followed by residency in Ophthalmology at Loyola School of Medicine in Chicago. He completed his Oculoplastic Surgery fellowship training at UT MD Anderson Cancer Center in Houston.

D. Brian Kim, MD

Cataract, Refractive Surgery, Corneal Specialist

Professional Eye Associates

Biography

D. Brian Kim, MD is a refractive cataract surgeon and corneal transplant specialist in private practice at Professional Eye Associates in Dalton, Georgia. Dr. Kim is volunteer clinical professor of ophthalmology at the Medical College of Georgia and is past president of the GSO and current councilor and member of the CME committee. He is also a member of the editorial advisory board for Cataract & Refractive Surgery Today.

Dr. Kim has published extensively on his interests in complex cataract surgery, anterior segment reconstruction, dislocated IOLs, scleral haptic fixation techniques, pars plana vitrectomy, and scleral & iris suturing techniques, and he has been an invited lecturer around the country on these techniques.

Dr. Kim is an active member of the American Academy of Ophthalmology (AAO) and the American Society of Cataract and Refractive Surgery (ASCRS) and continues to teach these topics through surgical wetlabs at AAO and ASCRS annual meetings. Dr. Kim also has a youtube channel dedicated to teaching where he has posted hundreds of surgical videos of his techniques to ophthalmic surgeons around the world.

Biography

Dr. Gagan Sawhney is a board-certified, highly respected, fellowship-trained ophthalmologist who specializes in cataract surgery as well as the medical and surgical management of glaucoma from early to advanced disease. His clinical expertise includes evaluation of patients suspicious for glaucoma, laser surgery for glaucoma, management of coexisting cataracts and glaucoma, minimally invasive glaucoma surgery, trabeculectomy, and glaucoma drainage device implantation. He is also trained in all disciplines of comprehensive ophthalmology.

Dr. Sawhney was one of the first glaucoma surgeons in Atlanta to incorporate minimally invasive glaucoma surgery into his glaucoma-surgical practice. He specializes in the iStent inject, Hydrus microstent, Kahook Dual Blade, OMNI goniotomy and the Xen gel stent. Dr. Sawhney is an active member of the community working in partnership with healthcare providers in the management of complex glaucoma patients.

He performs surgery at Eye Surgery Center of Georgia, our state of the art ambulatory surgery center, as well as Marietta Surgical Center and Emory Midtown Hospital. He also serves patients at our Northside and Woodstock locations. Having a particular interest in clinical research and medical education, Dr. Sawhney has published scientific articles in peer-reviewed journals and has presented his research at national meetings.

Dr. Sawhney is actively involved in clinical glaucoma research. After completing his undergraduate degree from the University of Pennsylvania and medical degree from Emory University School of Medicine, Dr. Sawhney completed both his ophthalmology residency and glaucoma fellowship at the prestigious Emory Eye Center. Dr. Sawhney is a member of the American Academy of Ophthalmology, the American Glaucoma Society, the American Society of Cataract and Refractive Surgeons, and the Georgia Society of Ophthalmology.

Vandana Reddy, MD

Founder & CEO, Cornea, External Disease & Cataract, Refractive Surgery

Northeast Georgia Ophthalmology

Biography

Vandana C. Reddy MD is the Founder & CEO of Northeast Georgia Ophthalmology. She attended Wellesley College, an all-women's college near Boston, Massachusetts and earned a degree in Neuroscience with honors. She earned her medical degree from the Medical College of Georgia with AOA honors and completed her ophthalmology training at the world renowned Mayo Clinic in Rochester, Minnesota. She then went on to complete a subspecialty surgical fellowship in Cornea, External Disease and Cataract, Refractive Surgery at the University of Michigan, Kellogg Eye Center in Ann Arbor, Michigan.

Her expertise is in cataract surgery, cornea and refractive surgeries, and comprehensive ophthalmology. She provides medical and surgical eye examinations in dry eye and lid margin disease, cataracts, glaucoma, diabetic eye disease, macular degeneration, and corneal diseases. Her surgical services include routine and complex cataract surgery with standard and premium intraocular lens implants, corneal procedures, pterygium surgery, minor eyelid surgeries, and laser surgeries to prevent/treat glaucoma and secondary cataracts.

Dr. Reddy has published in her field and presented at many conferences over the years. She is a member of the American Academy of Ophthalmology, Georgia Society of Ophthalmology, Medical Association of Georgia, and Women in Ophthalmology. Dr. Reddy is passionate about providing and developing great patient relationships. She strives in providing excellent medical and surgical eye care.

Nichelle Warren, MD

Junior Associate

Georgia Eye Partners

Biography

Dr. Nichelle Warren is a board-certified, highly respected, fellowship-trained ophthalmologist who specializes in cataract, refractive and corneal surgery. She remains on the cusp of the latest technologies and research in anterior segment surgeries. As a result of her research she won the Helma Award for outstanding research during her residency at the Medical University of South Carolina (residency program ranked #9 by Ophthalmology Times).

Dr. Warren received further sub-specialty training in Cornea and Refractive Surgery from Emory University. She is well versed in treating Fuch's dystrophy and other causes of corneal edema. She is one of a few surgeons performing Descemet Membrane Endothelial Keratoplasty (DMEK) which allows for faster visual recovery, and lower rates of rejection. She also has experience in treating keratoconus, complex cataract and corneal diseases. Dr. Warren offers premium intraocular lenses, astigmatism correction, femtosecond laser-assisted cataract surgery, and various methods of corneal transplants.

When she is not at work, she loves spending time with her husband, family, and friends. Dr. Warren's hobbies include trying new foods from around the world (her personal favorite is Indian), reading, art, and enjoying the great outdoors.
